„Small masterpiece“

„Heco wants to seduce the sophisticated minds. With a beautiful woman. „BellaDonna“ is the name of the latest launch - a two-way speaker that should blast the competition of floorstanding speakers away.“

„The ensemble of BellaDonna and Stand looks seductively good.“

„How does the potential noble transducers sound? The Qobuz Best list tells us John Mellencamp is generating super sales right now. Raspy voice in the middle, two guitars to the side - there's no air for the wrong show. This is so close to the roots that even the great Bruce Springsteen joined in on three songs. Sounds great earthy and highly dynamic. And the Heco recognizes the message immediately. Perfectly succeeds the reproduction. This speaker at its best moments had the precision of a studio monitor.“

„The BellaDonna wants fire at its terminals. As velvety as it can play up high - a small tube amplifier is not the right match. Watts and high stability are needed. The maximum swivel: Bach on the piano - the wonderful Cyprien Katsaris plays in 24 bit. Everything pearls, everything seems light. We immediately capture the genius of Bach and in addition the playfulness of Katsaris. The Heco is delighted by the brilliance of the recording, with high energy the noble piano tone reaches our eardrums. Never harsh, always with contour and one of the most important values in the high-end world: musicality.“

Conclusion:

„Noble in every single way: exceedingly high-quality workmanship, bold design - above all, a fine, highly informative sound. The BellaDonna manages everything easily, with a tendency to warm tuning. But: the right amplifier is required.“

Room acoustics and placement: The Heco can also be placed close to the wall - especially in the bass, the experiment is worthwhile. Experiment.
