Highlight

„A thoroughly fascinating speaker!“

„[...] The La Diva uses an extremely rich, finely resolved and airy spectrum of timbres to breathe life into the sound.“

„[...] It can also convey the dynamics and dimensions of the grand piano in a credible manner and it depicts the instrument as a whole: We are not left with an image of the keys that have just been played, but rather a relief of the entire keyboard together with the resonating body – a commanding rendition that has a powerful impact. I feel literally exhausted and equally charged, and there’s no room for anything else this evening, let alone electro.“

„[...] The La Diva masters the dynamic and tonal demands of this track with ease, while operating in an immensely agile manner and depicting the smallest nuances in the midst of layers of a dry synthesizer bass – that’s what I call sovereignty in the lower frequencies. A thoroughly fascinating speaker!“

Sound quality	Outstanding
Configuration	Good - Very good
Features	Very good
Workmanship	Very good
Test result	Very good

Conclusion:

„In practice, Heco’s La Diva proves to be an uncomplicated speaker that does not require meticulous positioning or any additional amplifiers. In terms of sound, it masters a difficult balancing act with aplomb: The La Diva can combine the presence of a large sound transducer with the coherence of a compact speaker. In particular, it is characterized by a finely graduated, rich spectrum of timbres and dynamic agility. Its credibly dimensioned spatial representation and exemplary sovereignty in the deepest registers round off a highly musical performance that makes listening to any genre an intensive experience. The La Diva is therefore unreservedly recommended for audiophile connoisseurs who are keeping an eye on their budget – **congratulations to Heco’s development team!**“
